❖ Lecture 1 (Linear Equations in Linear Algebra)

1.1 Systems of Linear Equations

Definition 1.1 (Linear Equation)**.** $a_1x_1 + a_2x_2 + \ldots + a_nx_n = b$

Definition 1.2 (A system of linear equations; Linear System)**.** A collection of one or more linear equations involving the same set of variables, say, $x_1, x_2, \ldots, x_n$

Definition 1.3 (Solution of a Linear System)**.** A list $(s_1, s_2, \ldots, s_n)$ of numbers that makes each equation in the system true when the values $s_1, s_2, \ldots, s_n$ are substituted for $x_1, x_2, \ldots, x_n$ respectively.

Theorem 1.4. A system of linear equations has (1) no solution, (2) exactly one solution, or (3) infinitely many solutions.

Definition 1.5 (Solution set)**.** The set of all possible solutions of a linear system.

Definition 1.6 (Equivalent systems)**.** Two linear systems with the same solution set

1.2 Second subsection

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.
